

Installation and Running Instructions

PLEASE SEND AN E-MAIL TO CLAIRERLAVELLE@GMAIL.COM AFTER YOU DOWNLOAD FRIENDLYROBOCOPY. THANK YOU.

Installation Instructions

You will need to download and install the following elements for FriendlyRoboCopy to work properly.

Go to www.ClearDigitalEvidence.com and download FriendlyRoboCopy. You can change the path of the folder where FriendlyRoboCopy is created, however, we recommend that you let Perl and its modules install in their default locations.

We recommend you install Perl and its modules before you download FriendlyRoboCopy.

What you need to run FriendlyRoboCopy properly:

- Perl

- version 5.8.3 or better. Download from:

<http://www.activestate.com/Products/ActivePerl/?mp=1>.

- Perl Modules

To install modules: http://www.perlmonks.org/?node_id=434813#installing

- Win32::DirSize module

- Math::Round module

- File::Basename module

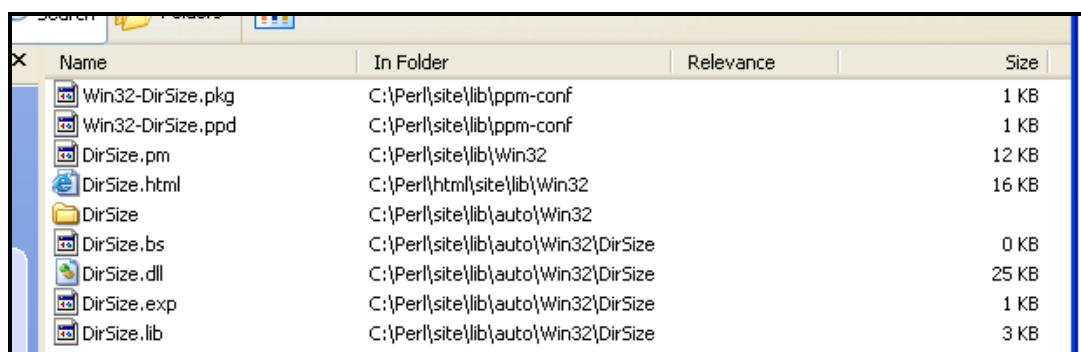

In case you cannot find Win32::DirSize module, do the following:

- Go to CPAN: <http://search.cpan.org/~arich/Win32-DirSize-1.13/Win32/DirSize/DirSize.pm>

- Download the .tar.gz file (top right of the screen)

- Decompress, unzip (if you use winZip, it does everything at once)

- Place the different files in the folders indicated below. Be aware that the four last files are already included in the DirSize directory.

Name	In Folder	Relevance	Size
Win32-DirSize.pkg	C:\Perl\site\lib\ppm-conf		1 KB
Win32-DirSize.ppd	C:\Perl\site\lib\ppm-conf		1 KB
DirSize.pm	C:\Perl\site\lib\Win32		12 KB
DirSize.html	C:\Perl\html\site\lib\Win32		16 KB
DirSize	C:\Perl\site\lib\auto\Win32		
DirSize.bs	C:\Perl\site\lib\auto\Win32\DirSize		0 KB
DirSize.dll	C:\Perl\site\lib\auto\Win32\DirSize		25 KB
DirSize.exp	C:\Perl\site\lib\auto\Win32\DirSize		1 KB
DirSize.lib	C:\Perl\site\lib\auto\Win32\DirSize		3 KB

Running Instructions

After Perl and its extra modules (3) are installed, double click the salamander icon on your desktop or navigate to where you installed FriendlyRoboCopy and double click on the salamander icon.

If you cannot find the reason why FriendlyRoboCopy is not launching, please contact clairerlavelle@gmail.com.

Enjoy!
